Government Report**

# About First Quantum

First Quantum Minerals Ltd. (“**First Quantum**” or the “**Company**”) is a leading and fast growing copper company founded more than 20 years ago with a strong conviction in the long-term fundamentals for copper. Beginning with the 1996 purchase of a mining licence in Zambia to reprocess tailings from past mining activities, our assets and operations now span nine countries and five continents. Today we are one of the world's top 10 copper producers.

Despite the additional challenges faced in the year, the Company achieved its highest ever annual copper production, attributable to record-breaking production at Sentinel and strong contribution from Cobre Panama. Our 2020 total production of 778,911 tonnes of copper represents an 11% increase on the previous year. In addition, we produced 265,112 ounces of gold. Cobre Panama, in its first full-year of commercial production, was placed on preservation and safe maintenance in April and operated at much reduced levels of activity for most of the second quarter and into the start of the third quarter. The operation successfully ramped up ahead of expectation in August, and in the fourth quarter set new quarterly mill throughput and copper production records.

# About this report

First Quantum makes significant contributions to the public finances of the countries in which we operate. We strongly support the various transparency initiatives which provide all stakeholders with clear information of the contributions which First Quantum makes to our host governments. The *2020 Tax Transparency and Contributions to Government Report* highlights First Quantum's contributions to our host Governments which helps to illustrate the positive impact we strive to create everywhere we do business.

This report is intended to meet Canada's *Extractive Sector Transparency Measures Act* ("**ESTMA**") reporting obligations as well as Chapter 10 of the EU Accounting Directive as noted in Appendix A of this report. All amounts in this report are expressed in U.S. dollars unless otherwise noted.

# Message from Chief Financial Officer

On behalf of the Board, I am pleased to present First Quantum's *Tax Transparency and Contributions to Government Report* for 2020. This report has been prepared in accordance with Canada's *Extractive Sector Transparency Measures Act* ("ESTMA") and Chapter 10 of the *EU Accounting Directive*, and is intended to provide greater clarity in relation to First Quantum's tax and economic contributions made in the countries that we operate.

In 2020, the strength and resilience of our business enabled us to protect our workforce and the many communities in which we operate, as the challenges of Covid-19 became apparent. In these difficult times in which governments are financing the response against Covid-19 and measures to support those who are severely impacted, we continued to pay taxes and royalties and to invest in our host nations to help improve health infrastructure and education outcomes, support the role of women, address housing issues, protect the environment, and support local communities including business and agriculture.

In addition to our regular CSR programs, we made many additional Covid-19-related contributions in 2020, which included the donation of medical equipment, PPE supplies and other medical resources to local communities. As we learnt to push back the contagion, we formed strong partnerships with various health authorities and community support institutions.

Amongst the Covid-19 contributions we have made across all the countries in which we operate, in Panama the Company has supplied transportable medical modules to assist with triage and treatment of patients at hospitals, and supporting families in need with food and supplies. In Zambia, the Company has provided Covid-19 testing equipment and treatment and isolation facilities for the community. We have created a new ICU and high dependency care unit in a local Zambian hospital. We have pledged financial support for the provision of medical logistics support in the Solwezi and Kalumbila districts of North-Western Zambia, and have contracted the local manufacturing of PPE in Zambia. The Company will continue to work with local health authorities and communities as we join together to overcome the pandemic.

Despite 2020 being an incredibly challenging year, we are proud to have continued to support the countries in which we operate by making total direct contributions to governments of \$1.088 billion, an increase of 4% on 2019.

In 2020, our contributions under ESTMA reporting amounted to \$516 million, an increase of more than 12% when compared to 2019. The increased contributions are mostly attributable to higher copper production at our mines in Zambia, Panama and Spain and overall higher commodity prices.

In addition to the \$516 million ESTMA reportable payments, we voluntarily reported payments in respect of consumption and import taxes, payroll taxes, withholding taxes, CSR and infrastructure that are outside the scope of ESTMA reporting. In 2020, our voluntarily reported payments totalled \$571.9 million, which includes \$112.8 million in tax payments made to the Zambian and Turkish governments via offset of VAT refundable. The taxes paid via offset include corporate income taxes, payroll taxes, VAT, withholding taxes and customs. Similar to 2019, the \$571.9 million voluntarily reported payments also includes Zambian VAT payments of \$191.9 million, the refund of which has been significantly delayed and not refunded in 2020.

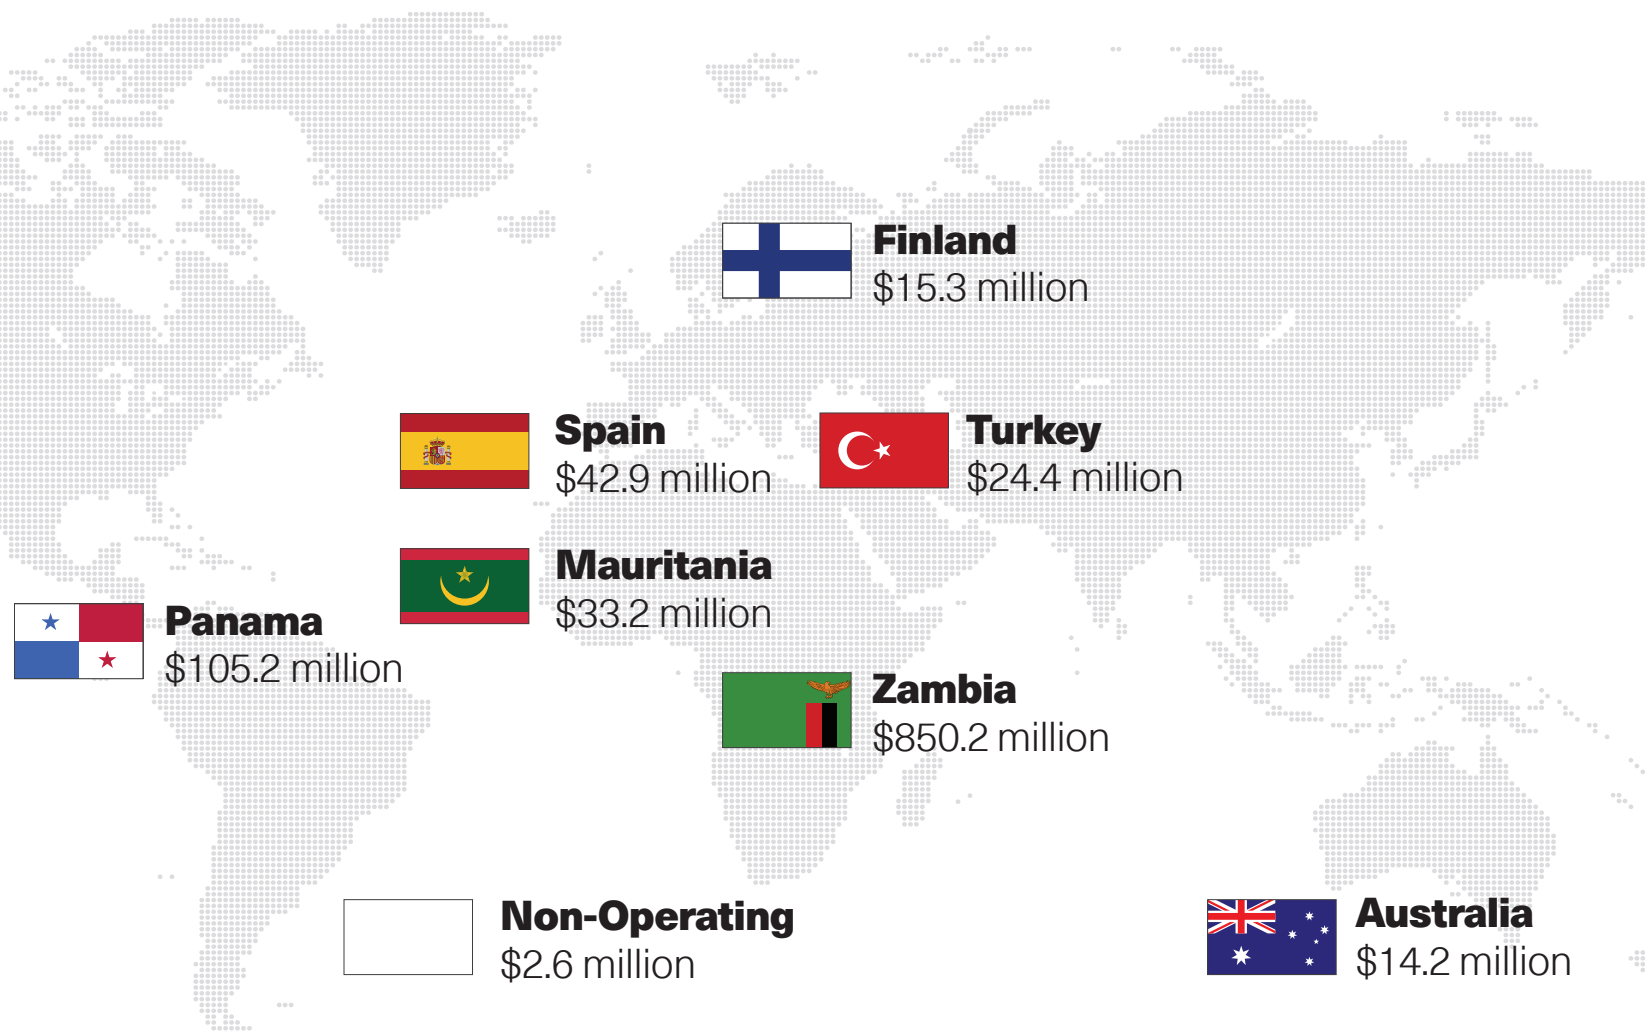

First Quantum's total direct contributions represent a significant tax and economic contribution to the countries in which we operate, giving local governments the opportunity to provide essential services to their citizens and invest in their communities for the future.

**Hannes Meyer**  
Chief Financial Officer

<sup>1</sup> Relates to payments reportable under ESTMA.

<sup>2</sup> Includes employer and employee burden.

<sup>3</sup> This figure only includes VAT that is non-refundable and import taxes, except for Zambia where the amount also includes \$191.9m refundable VAT remitted in 2020 and pending repayment. The Company's Zambian operations have continued to accrue VAT receivable amounts with minimal cash refunds received or offsets to other tax liabilities approved. The inclusion of the 2020 VAT in Zambia reflects the risk that VAT repayments owed to the Company have been significantly delayed.

<sup>4</sup> This figure includes CSR directly to communities and infrastructure improvement payments where the primary user is the Company.

<sup>5</sup> Taxes are reported net of credits, offsets or refunds. The taxes (including corporate income taxes, payroll taxes, VAT, withholding taxes and customs) paid by way of offsetting VAT refunds owing to the Company are presented separately to illustrate non-cash contributions. The offsets received in relation to the Company's Zambian operations relate to VAT refunds outstanding from prior years.

### Additional Notes

<sup>1</sup> Above numbers are reported in USD. When a payment is made in a foreign currency by a subsidiary which uses USD as its accounting functional currency, the payment is generally reported using the exchange rate existing at the time the payment is made. For those subsidiaries whose accounting functional currency is their local currency, payments reported have been translated using the yearly average exchange rates which are as follows:

Currency	USD
Argentine peso	70.5861
Australian dollar	1.4478
Chilean peso	792.0820
Euro	0.8760
Peruvian nuevo sol	3.4948
Turkish lira	7.0213
Zambian kwacha	18.2980

<sup>2</sup> The Company reported all payments in excess of USD \$78,542 (CAD \$100,000/1.2732 year-end exchange rate) per payee per category.

<sup>3</sup> Infrastructure improvement payments include in-kind contributions. The method for calculating the value of the payments is at cost.

# About this report

## Basis of preparation and scope

This report has been prepared as required by the ESTMA and the EU Transparency and Accounting Directive with respect to disclosure of Payments to Governments, along with voluntary additional reporting of contributions relating to payroll tax, consumption tax and social contributions. Taxes, production entitlements, royalties and other payments to governments are presented on a cash-paid basis during the reporting period. In-kind payments are converted into monetary value at the date of settlement. The report includes all such payments for activities which relate to exploration, discovery, development and extraction of minerals for each of our projects.

First Quantum Minerals Ltd., as parent of the group, reports the activity of any of its subsidiary undertakings that are active in the extractive industry. Unless noted otherwise in the report, the following terms have the meanings noted below:

### **Government**

Any national, regional or local authority of a country and includes any department, agency or undertaking controlled by such an authority. Also included are any crown corporations and other state-owned enterprises that are exercising or performing a power, duty or function of government.

### **Project**

Project means the operational activities that are governed by a single contract, license, lease, concession or similar legal agreement and form the basis for payment liabilities with a government. Nonetheless, if multiple such agreements are substantially interconnected, this shall be considered a project.

### **Tax**

Tax generally means any type of government charge that is enforceable by law, imposed under statutory authority, levied by a public body and intended for a public purpose.

### **Royalties**

Payments to governments in respect of revenue or production related to the extraction of mineral reserves.

### **Fees**

Payments to governments where no specific service is attached, but rather 'levies' on the initial or ongoing right to use an area for exploration, development and/or production. Such fees include licenses, rentals, entry fees and other consideration for licences and concessions.

### **Production Entitlements**

A payee's share of mineral production under a production sharing agreement or similar contractual or legislated arrangement should be categorized as a production entitlement under ESTMA. The Company does not currently pay any production entitlements.

### **Bonuses**

Signing, discovery, production and any other type of bonuses paid to a payee in relation to the commercial development of minerals must be reported under the Act.

### **Dividends**

Payments so named to governments, other than dividends to government units in their capacity as ordinary shareholders in an enterprise.

### **Infrastructure Improvements**

Payments to governments, comprising of the provision of public access infrastructure, such as roads and bridges. Payments are either in the form of cash or in kind contributions (the completed infrastructure). Payments in respect of social or community programs such as building/providing a hospital, school or playground are excluded.

Disclosure threshold - payments to the "same payee" that meet or exceed CAD \$100,000 in one category of payment are disclosed.
